

Unleash the power of innovative Dynabook technology.

Conquer your day—at a desk or on the go—with one of the most innovative line of PCs in the market. Dynabook laptops are engineered for business and education to deliver the quality, reliability and performance you expect.

The Dynabook Difference

Proprietary BIOS

Dynabook writes its own secure BIOS (the base firmware executed when a PC is turned on and initializes the hardware and loads the OS). Our BIOS enhances tamper resistance, secures pre-boot communication, optimizes performance and provides the ability to customize settings and information.

Rigorous Testing

Committed to quality and reliability, we develop, engineer, manufacture and extensively test laptops in-house to optimize system components. Rest assured, Dynabook laptops undergo strict military graded testing (MIL-STD-810G) to ensure durability and performance.

Value-Add Customization

Get the exact technology you need, without paying for features you don't need. In addition, we can configure each new PC without delaying shipment. Configuration services include Image Load, Asset Tag and Customer BIOS Settings.

Custom-Built Laptops

Our laptops are engineered with a full range of in demand features, but every business is different. With unrivaled attention to detail, our technical professionals will work directly with you and your IT staff, tailoring a customized solution and assembling everything you need right at the factory.

Industry-Leading Warranty

The +Care ServiceSM Warranty is a premier standard warranty available for up to four years that is designed to keep your business moving. Our technical phone support, depot repair, carry-in repair and onsite repair help boost productivity, cut downtime and reduce IT costs.

Our Dynabook Laptop Lineup

Within our Tecra®, Portégé® and Satellite Pro™ product families, we offer a wide-ranging portfolio of laptops from entry-level to premium and traditional clamshell to multifunction convertibles.

Portégé Series

The Portégé product line delivers the latest in innovation. It's one of the world's lightest 13.3-inch (13.3-inch diagonal) laptop, featuring award-winning 2-in-1 computing solutions and an extensive collection of Windows Secured-core PCs, making it one of the most secure Windows devices available today.

Tecra Series

A collection of productivity workhorses, the Tecra family of laptops offer everything a professional user needs to succeed. Featuring powerful processors, robust connectivity and enterprise-grade security, the Tecra portfolio will not disappoint.

Satellite Pro Series

The Satellite Pro™ series is a family of laptops with modern designs and all-around computing capabilities that deliver exceptional value ready for the most demanding tasks required by today's workers and students.
