

Why IT Professionals Love the Sharp AQUOS BOARD Interactive Display

Open architecture yields seamless integration

- The AQUOS BOARD™ interactive display system seamlessly integrates with and leverages your existing infrastructure and software investments.
- It works great with your existing video conferencing and AV control systems so you can take collaboration to the next level.
- For education classroom environments, it integrates with leading learning management systems.

Meetings are conducted the way you want

- The equipment is familiar and intuitive.
- Business meetings are more productive because there is no need to learn an entirely new system.
- Allows users to take advantage of inking functionality in Microsoft® Office applications. For example, you can directly annotate and save within PowerPoint® without having to use or purchase a third party overlay or application.

Enhanced collaboration means a smoother workflow

- Workflow and productivity is smoother and more streamlined through enhanced collaboration.
- You have the freedom to save and share presentations and meeting notes any way you want using Sharp Touch Display Link, Sharp Cloud Portal Office, DropBox™, email and various other solutions.
- Up to 100 participants can view and participate in a presentation while in the same room or remotely through VPN using tablets, smartphones or computers.
