

KYOCERA
MOBILE PRINT

PRINTING TO MATCH YOUR ON-THE-GO WORK STYLE.

PRINT FILES, WEB PAGES, AND IMAGES ON DEMAND.

KYOCERA MOBILE PRINT GIVES YOU THE CONFIDENCE OF KNOWING YOU ARE PREPARED FOR ANYTHING AND ABLE TO ACCESS AND PRINT YOUR IMPORTANT DOCUMENTS FROM ALMOST ANYWHERE.

Today's increasingly mobile business environment has created an unprecedented demand for on-the-go access to files and documents. Whether for business travel, working between multiple locations, or virtual offices, the mobile workforce is looking to transform their entire office into a mobile experience. While smartphones and tablets meet the need for digital access to content, print and scan capabilities are becoming more and more essential.

Kyocera offers a smart solution with KYOCERA Mobile Print, a value add app that enables users to securely print documents, web pages, and images – as well as copy and print text from a clipboard or scan and share content with other apps – on demand from virtually anywhere on their Apple® and Android smartphone or tablet devices to select Kyocera MFPs and printers. Users can scan files and images from the MFPs to their mobile devices. And with QR discovery capability, KYOCERA Mobile Print offers users an easy way to identify and connect with a Kyocera device – further streamlining printing and scanning processes.

By eliminating the burden of carrying cumbersome printed files on the chance you need them, or the hassle and lack of security associated with e-mailing files to someone connected to a network in order to have them printed for you, KYOCERA Mobile Print puts you in control.

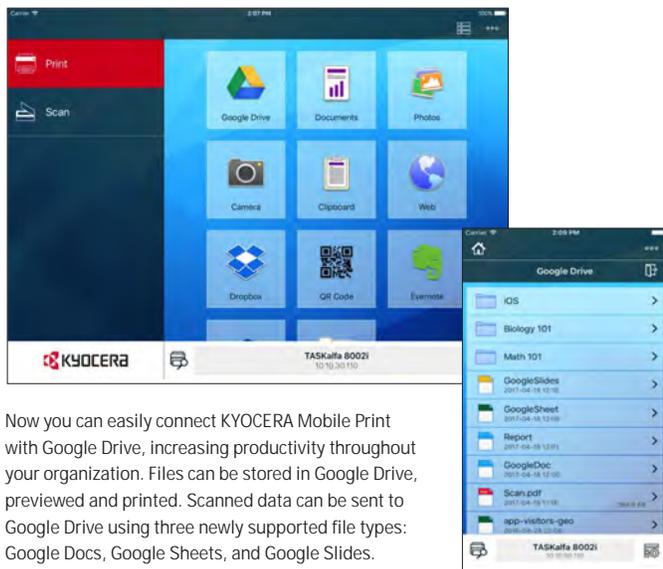

THREE EASY STEPS TO PRINTING ON THE GO

1. Connect your mobile device to the same Wi-Fi network as the Kyocera MFP or Printer you will be using to print.
2. Use the Mobile Print app to open the document, image, text or web page you wish to print.
3. Select the device you wish to print to, set your preferences and press Print.

IT'S THAT SIMPLE!

 **KYOCERA**
Document Solutions

Now you can easily connect KYOCERA Mobile Print with Google Drive, increasing productivity throughout your organization. Files can be stored in Google Drive, previewed and printed. Scanned data can be sent to Google Drive using three newly supported file types: Google Docs, Google Sheets, and Google Slides.

WITH KYOCERA MOBILE PRINT, YOUR MOBILE DEVICE DOES ALL THE WORK, BECOMING AN INTEGRATED PART OF YOUR DOCUMENT WORKFLOW.

With our newest devices, there is no need to be physically connected to a corporate network; the app can quickly identify Kyocera Printers and MFPs via a Wi-Fi connection.* Once you've located a device, simply access the documents you want to print. With the ability to handle many common file formats, a few quick strokes are all it takes to transform digital files, scans and images to printed sheets. A wide array of settings including quality, duplex, pages per sheet, and job accounting help maximize output control. The new Unified User Interface features large icons and makes viewing, printing, scanning, and transferring documents a whole lot easier. For efficiency, Slide Over/Split View provides a user-invoked overlay with the ability to view and interact with two screens side by side.

Mobile Print integrates with e-mail, Evernote® and Google Drive™ with three newly supported file types- Google Docs, Google Sheets, and Google Slides - to further enhance the print versatility of your mobile device. You can even print web pages accessed through the app's built-in web browser. The ability to print from and scan to various cloud services takes this solution to the next level. The Wi-Fi Direct feature also allows for wireless connectivity to supported Kyocera MFPs and printers.

THE BENEFITS OF KYOCERA MOBILE PRINT

- › The Voiceover/Talkback feature enables you to speak to your iPhone/Android phone, respectively, or enables it to speak to you-communicating what functions are available on your mobile app screen.
- › The User Interface provides a clean look and large icons, making it easy to navigate with reduced operational steps.
- › Robust solution that Supports Cloud & Shared Folder (SMB), and Print from and Scan to Cloud/Shared Folder (SMB).
- › Effortlessly select from multiple destinations to share to after scanning including email, Google Drive, DropBox, Evernote, OneDrive, or a SMB Shared Folder.
- › No costly or burdensome infrastructure required - the app resides on the mobile device and interfaces seamlessly with automatically identified compatible Kyocera MFPs and printers.
- › Print options include choosing the Paper Source tray and selecting available Media Types.
- › Protect sensitive information with encrypted PDF capability, and PDF files can be separated into several different specified pages.
- › Copy and print text from other applications using the app's Clipboard Printing functionality.
- › NFC (for Android) and Wi-Fi Direct support on compatible Kyocera MFPs and printers.
