

PrintReleaf empowers businesses to certifiably reduce the environmental impact of using forest products by automatically planting trees across a global network of reforestation projects.

PRINTRELEAF EXCHANGE

PrintReleaf measures paper consumption through technology integrations with popular Managed Print Services (MPS) print monitoring software applications and OEM databases which capture the required paper consumption data (meter data) to drive the PrintReleaf service.

PrintReleaf plants trees through a network of certified reforestation projects located around the world. Once trees are planted, PrintReleaf administers an 8 year audit process to track the progress and survivability of the trees.

Third party verification and reporting services are provided by a certifying body (CB) - SGS International – a leading international forestry auditor. The verification process is visible to the customer in PrintReleaf to provide transparency and certification. PrintReleaf provides a way for customers to actively participate in sustainable business practices and certifiably replace what they take from the world's forests.

PRINTRELEAF VALUE

PrintReleaf unlocks more collective shared value than just reforestation.

ENVIRONMENTAL HEALTH
Guaranteed reforestation and 100% net survival of all trees per the PrintReleaf Standard.

CERTIFICATION
Independent certification and verification provided by SGS International.

JOBS
New jobs to communities where we plant trees.

TECHNOLOGY
Patent-pending technology and engaging user experience.

BRANDING
Automated promotion to both partner and customer social media channels.

AUTOMATION
End to end automation for the entire offering.
